

shock absorber

shock absorber 14-18 mm
Item number: Fallabsorber

Description:

fall (drop) absorber tested to meet UIAA Standards with 80 kg at a height of 3 m.

prevents the carabiner breakage during the fall.

- via ferrata fall shock absorber to prevent carabiner breakage
- easy installation
- upgrade existing lines Ø 14 - 18 mm
- Securing difficult places with potential for straight unstopped falls.

Via ferrata shock/drop absorber assembly instructions

Place the supplied nut in one half of the fall (drop) absorber. Place both halves of the fall (drop) absorber on the via ferrata wire rope at the key point to be secured, just above the mounting anchor. Insert the screw on the unnutted fall absorber half and tighten carefully (be careful, the nut can slip if the tightening torque is too high). Check all screws again for tightness. Carefully press the fall absorber down on the rope so it rests slightly above the Anchor.
