

forged via ferrata anchor

galvanized

Item number:MÖG-XX/XX0

Forged via ferrata anchor DN20 hot-dip galvanized

Item nr.	nominal size	total length
MÖG-20/250	approx. 23 mm	approx. 250 mm
MÖG-20/300	approx. 23 mm	approx. 300 mm
MÖG-20/350	approx. 23 mm	approx. 350 mm
MÖG-20/400	approx. 23 mm	approx. 400 mm
MÖG-20/450	approx. 23 mm	approx. 450 mm
MÖG-20/500	approx. 23 mm	approx. 500 mm
MÖG-20/600	approx. 23 mm	approx. 600 mm
MÖG-20/700	approx. 23 mm	approx. 700 mm
MÖG-20/800	approx. 23 mm	approx. 800 mm
MÖG-20/900	approx. 23 mm	approx. 900 mm
MÖG-20/1000	approx. 23 mm	approx. 1000 mm

Via ferrata anchor DN26 forged hot-dip galvanized

Item nr.	nominal size	total length
MÖG-26/250	approx. 30 mm	approx. 250 mm
MÖG-26/300	approx. 30 mm	approx. 300 mm
MÖG-26/350	approx. 30 mm	approx. 350 mm
MÖG-26/400	approx. 30 mm	approx. 400 mm
MÖG-26/450	approx. 30 mm	approx. 450 mm
MÖG-26/500	approx. 30 mm	approx. 500 mm
MÖG-26/600	approx. 30 mm	approx. 600 mm
MÖG-26/700	approx. 30 mm	approx. 700 mm
MÖG-26/800	approx. 30 mm	approx. 800 mm
MÖG-26/900	approx. 30 mm	approx. 900 mm
MÖG-26/1000	approx. 30 mm	approx. 1000 mm

Via ferrata anchor DN30 forged hot-dip galvanized

Item nr.	nominal size	total length
MÖG-30/300	approx. 30 mm	approx. 300 mm
MÖG-30/400	approx. 30 mm	approx. 400 mm

additional lengths up to 1m in stock! Production of custom lengths possible

Description

After heating up to a temperature between 900 and 1300°C the metal billets are press forged with our specially designed die. The advantage of this method is that our via ferrata anchors are made out of a tension free steel structure. After forging the anchors, they get hot dip galvanized according to standards EN ISO 1461.

The holes are pierced in to fit our wire rope grips between M 13 to M19 (DKV 0513, DKV 0516, DKV 0519) If you plan to use different sized clamps please state so in the order.
